Reflective Entry (Weekly activities)	Signature and remarks of faculty
• Learned from our course teacher how to conduct a literature review and perform gap analysis. • Attended a meeting with the teammates to discuss this week's tasks. • This week, I read the paper titled "**JuristRAG: Enhanced Semantic Question Answering for Bangladeshi Statutes(2025)**" published in the 28th ICCIT. ▪ Key Findings: • Uses RAG for legal QA, combining iterative retrieval with query decomposition (Llama 3.1 8B) • Corpus: 3 Bangladeshi criminal-law Acts (Penal Code, CrPC, Special Powers Act), 1,112 sections • Preprocessed section-by-section to keep meaning intact • Embedding model: BAAI/bge-m3 (sparse + dense retrieval) • Evaluated on 700 generated QA pairs + reviewed by 2 lawyers • Main goal: reduce hallucination in legal answers. • Recorded the research gaps identified from the papers reviewed in an Excel sheet.
